

# Honors Single Variable Calculus 110.113

October 4, 2023

## Contents

<b>1</b>	<b>Assessments and Grades</b>	<b>1</b>
1.1	Late policy . . . . .	1
1.2	Weekly Homework . . . . .	1
1.3	Projects . . . . .	2
1.4	Grades . . . . .	3

## 1 Assessments and Grades

Your final grade for the class will be given as a weighted average with the weights given as follows:

- Weekly Homework | 40%
- Project Homework | 60%

### 1.1 Late policy

*To be updated.* Late policy for all submissions: There will be a 48-hour late window to upload and/or complete assignments and a late penalty of 10% per day applied to the late submissions. No assignments will be accepted after the late deadline has passed except in extenuating circumstances (in the case of extenuating circumstances please coordinate with your case manager and reach out to your instructor and TA ASAP. Late submissions without documented communication with the course staff will not be accepted.) Regrade requests will be accepted for assignments one week after they are returned.

### 1.2 Weekly Homework

There will be one homework assigned for each week in Canvas.

I. **Initial assessment** Each problem is worth

$$[12 + 5 \times (\text{number of stars})] \text{ points}$$

consisting of 12 base points and a 5-point bonus for each added complexity. Your score is the 3 problems you have chosen to be graded in your submission.

Grade X is given if number of points achieved is greater or equal than

$$\lfloor \text{Grade X \%} \times (36) \rfloor$$

For example to get grade A, you will need  $\lfloor 90\% \times 36 \rfloor = 32$  points. Note: Achieving a higher grade can be more accessible by attempting starred problems, as they offer additional points.

**Good luck!**

- II. **Second-Chance Assessment (For scores  $\leq 70\%$  on individual questions)** If you score less than half marks on a question, you have the opportunity to explain your solution during office hours.
- III. If your explanation is satisfactory, you can earn up to 75% of the original points for that question.
- IV. **Minor Correction Opportunities (For scores  $\geq 50\%$  on individual questions)** If you score at least half marks but make minor errors, you can correct these during office hours. If your corrections are satisfactory, you can earn back up to 25% of the points you originally lost on that question.

### 1.3 Projects

Project homework - Project homework are longer. The problems are easier in terms of computation but require an understanding of new concepts. This is an opportunity for you to explore the application of the materials learned in class in different contexts. There will be three given during the semester. The Key dates:

- Week 4, Friday, Sep 20th. 1st project published.
- Week 11, Friday, Nov 3rd, 1st project is due.
- Week 15 Friday, Dec 15th, 2nd project is due.

## 1.4 Grades

Grades in the course will be assigned based on the following distribution:

Grade	Range	
A	100%	to 94.0%
A-	< 94.0%	to 90.0%
B+	< 90.0%	to 87.0%
B	< 87.0%	to 84.0%
B-	< 84.0%	to 80.0%
C+	< 80.0%	to 77.0%
C	< 77.0%	to 74.0%
C-	< 74.0%	to 70.0%
D+	< 70.0%	to 67.0%
D	< 67.0%	to 64.0%
D-	< 64.0%	to 61.0%
F	< 61.0%	to 0.0%
